Employee Review System

Problem statement
Create an application that allows employees to submit feedback toward each other's performance

Instructions
- You are **ALLOWED** to style the app any way you like, you can use any CSS framework if you want.
- You are **ALLOWED** to google and read how to approach the problem.
- **DO NOT** copy and paste code from the internet.
- **DO NOT** cheat with other students. **REMEMBER:** *These tests are for YOU so that you can learn something new. Cheating won't help. It's better to not submit the solution than to cheat and submit. PS: There will be a plagiarism check and when found cheating, you won't be allowed to give future tests.*
- Once you have finished with the test, make a video recording your computer screen (via phone or a software like OBS/screencastify etc) and **explaining how you have approached the problem** *IN CODE* **and showing ALL THE FEATURES OF the final product**. The video can be **UPTO 5 mins** long. *Please don't record videos longer than that.*
- **Upload** the code on github as well, you might not host it **SO MAKE SURE VIDEO IS PERFECT** (you MIGHT need to host it somewhere I will share the steps if hosting would be required).
- Once you have recorded the video, upload it on youtube (unlisted or whatever).

Features *(No need for extra features, just make the listed features)*
- Admin view
  - Add/remove/update/view employees
  - Add/update/view performance reviews
  - Assign employees to participate in another employee's performance review
- Employee view
  - List of performance review requiring feedback
  - Submit feedback
- Make 1 login for admin and employee
- An employee can register, only admin can make an employee an admin

Points on which the project will be judged
- All functionalities mentioned above
- *VIDEO*: Since this project may not be hosted, the video has to be perfect show casing each functionality with proper audio etc.
- Github
  - Readme.md file (a good readme should contain folder structure, how to start a project etc)

- Code and Structure
  - Comments
  - Structuring of files and folder
  - Indentation
  - Variables and functions naming
- Design
- Creativity
